

The Rideau Valley Conservation Authority is the lead intermunicipal agency working to address river-related environmental issues and concerns within the Rideau Valley watershed. Thanks to our many partners, the scope of our environmental protection work includes planning, source water protection, tackling flooding and erosion problems and researching water movement and use in the valley. We help people maintain healthy shorelines, provide advice on development-related issues and report to municipalities, agencies and the public about watershed conditions and trends. We also provide public access to natural waterfront areas, deliver community-based stewardship programs, reduce water pollution and protect fish and wildlife habitat.

Engineering Assistant

Two-year Contract

\$46,739 - \$55,642 (plus benefits)

Our offices are located in a suburban area just south of Ottawa where public transportation is limited. Candidates should ensure they have reliable transportation prior to applying.

Reporting to the Senior Water Resources Engineer, the Engineering Assistant is responsible for various technical, analytical and data processing tasks in the general area of water resources engineering.

Under direct supervision, you will perform a wide range of technical tasks related to hydrology, hydraulics, computer modeling, floodplain mapping and watershed management. You will collect and analyze relevant data and present engineering analyses using appropriate spreadsheet and GIS software. You will also be involved in field surveys, report writing and other related activities.

As the ideal candidate, you must hold a Bachelor's Degree in Civil or Water Resources Engineering. You will have some relevant experience. Competence is required in hydraulics, hydrology, computer modeling, floodplain management and data analysis. Familiarity with standard hydrologic/hydraulic models such as HEC-2, HEC-RAS and CFA, strong problem-solving and analytical skills, proficiency in computer applications (especially MS-Word and Excel), and basic knowledge of GIS products are desirable. You must have a valid driver's license and a relatively clean driving record.

If you have a strong personal commitment to championing protection of the environment and the safeguarding of land and water resources we'd like to hear from you. Please send your resume and covering letter by **8:00 a.m. on Monday, June 5th** to:
