

# **Index of Figures & Tables**

## INDEX OF FIGURES AND TABLES

| <b>Part 1: Introduction</b> |  |             |
|-----------------------------|--|-------------|
| <b>Figure</b>               | <b>Title</b>   | <b>Page</b> |
| 1.1                         | Subwatersheds within the RVCA's jurisdiction   | 8           |
| 1.2                         | Catchments within the RVCA's jurisdiction  | 9           |
| 1.3                         | The physiographic regions of the Rideau River Watershed  | 14          |
| 1.4                         | Map of physiographic regions in the larger Eastern Ontario region  | 15          |
| 1.5                         | Artist's interpretation of the faulted sedimentary rock layers that underly the Smiths Falls Limestone Plain above Ottawa. | 17          |
| 1.6                         | Current and planned hazard mapping within the RVCA jurisdiction (current to date of publication)                           | 23          |
| 1.7                         | Known erosion hazard areas within the RVCA's jurisdiction  | 27          |
| 1.8                         | Sensitive Marine Clay within the RVCA's jurisdiction   | 29          |
| 1.9                         | Large Retrogressive Landslide Scars in the Rideau River and Ottawa River watersheds within the RVCA's jurisdiction.        | 30          |
| 1.10                        | Small landslide sites in the Rideau River and the Ottawa River watersheds  | 31          |
| 1.11                        | Organic Soils within the RVCA's jurisdiction   | 33          |
| 1.12                        | Karst Bedrock within the RVCA's jurisdiction   |             |
|                             |  |             |
| <b>Table</b>                | <b>Title</b>   |             |
| 1.1                         | Historic Floods in the National Capital Region   | 25          |

## Part 2: Water

| Figure | Title   | Page |
|--------|---|------|
| 2.1    | Weather & Stream Monitoring Sites   | 42   |
| 2.2    | Snow Course Monitoring Sites  | 43   |
| 2.3    | Rideau Valley Watershed - Parks Canada Operation Summary  | 44   |
| 2.4    | Major Lakes and Tributaries   | 45   |
| 2.5    | Water Control Structures by Owner   | 47   |
| 2.6    | Flow Duration Curve for the Lower Rideau River (02LA004)  | 52   |
| 2.7    | Stream Flows: Rideau at Ottawa (02LA004); 1971-2022   | 55   |
| 2.8    | Stream Flows: Jock River at Moodie Dr (02LA007); 1986-2022  | 55   |
| 2.9    | Stream Flows: Kemptville Creek at Kemptville (02LA006); 1988-2022   | 56   |
| 2.10   | Stream Flows: Tay River at Perth (02LA024); 1995-2022   | 56   |
| 2.11   | Low Flow: Rideau at Ottawa: 7-Day average minimum flow (02LA004); 1940-2022   | 59   |
| 2.12   | Low Flow: Jock River at Moodie Dr: 7-Day average minimum flow (02LA007); 1969-2022  | 59   |
| 2.13   | Low Flow: Jock River at Moodie Dr: 7-Day average minimum flow (02LA007); 1969-2022  | 60   |
| 2.14   | Use of Underground Drinking Water Reserves and Highly Vulnerable Aquifers Across the Rideau Valley: Private and Public Groundwater Takings  | 67   |
| 2.15   | Precambrian Shield Aquifer and Paleozoic Sedimentary Rock Layer Aquifer Areas   | 68   |
| 2.16   | Artist's portrayal, from west to east, of the Precambrian Shield Aquifer and Paleozoic Sedimentary Rock Layer Aquifer underlying the Mississippi – Rideau Source Protection Region. | 68   |
| 2.17   | Average seasonal well water levels in the Rideau Valley   | 70   |
| 2.18   | Groundwater level minimums and maximums as depths below ground  | 72   |
| 2.19   | Bedrock groundwater flow divides and direction from the Urban Geology of the National Capital Region  | 73   |
| 2.20   | Distribution of specific capacity across the watershed  | 74   |
| 2.21   | Chloride levels in groundwater across the Rideau Valley   | 76   |
| 2.22   | Nitrate (N) levels in groundwater across the Rideau Valley  | 77   |
| 2.23   | Hardness levels in groundwater across the Rideau Valley   | 78   |
| 2.24   | Dissolved iron in groundwater across the Rideau Valley  | 79   |
| 2.25   | Dissolved manganese in groundwater across the Rideau Valley   | 80   |
| 2.26   | Other dissolved metals found at or above their respective maximum acceptable concentration, aesthetic objective, or operational guideline in groundwater across the Rideau Valley   | 81   |

## Part 2: Water

| Figure | Title   | Page |
|--------|---|------|
| 2.27   | Monitored lakes in the Rideau River Watershed   | 88   |
| 2.28   | Lake trophic status in the Rideau Lakes and Middle Rideau Subwatersheds; 2001 to 2021   | 90   |
| 2.29   | Lake trophic status in the Tay River Subwatershed; 2001 to 2021   | 90   |
| 2.30   | Overall Aquatic Score by Catchment  | 116  |
| 2.31   | Benthic Invertebrates Communities Score by Catchment  | 118  |
| 2.32   | Fish Communities Score by Catchment in the City of Ottawa   | 120  |
| 2.33   | Thermal Regime by Catchment   | 121  |
|        |   |      |
| Table  | Title   |      |
| 2.1    | Average annual temperature & precipitation trends from 1981-2020  | 49   |
| 2.2    | Annual peak snow water equivalent (SWE) trends from 1981-2020   | 50   |
| 2.3    | Average seasonal flows trends from 1981-2020  | 51   |
| 2.4    | RVCA Low Water Declarations by year (2001-2021)   | 61   |
| 2.5    | Projected annual & seasonal climate trends in the National Capital Region from 2021 to 2100   | 63   |
| 2.6    | Lake Trophic Status Ranges  | 89   |
| 2.7    | CCME Water Quality Index Score Categories and descriptions  | 91   |
| 2.8    | Lake WQI score ranges and WQI score trends on collected data from 2001-2021   | 92   |
| 2.9    | Lake Parameter Concentrations 75th Percentiles and/or median values and trends (p value<0.1) on collected data from 2001-2021   | 96   |
| 2.10   | Catchment level stream and tributary Water Quality Index (WQI) scores and trends on collected data from 2010-2021   | 100  |
| 2.11   | Calculated catchment level stream and tributary nutrient parameter concentrations 75th percentiles and trends (p value<0.1) on collected data from 1998-2021                | 104  |
| 2.12   | Calculated catchment level stream and tributary metal parameter concentrations 75th percentiles and trends (p value<0.1) on collected data from 1998-2021                   | 108  |
| 2.13   | Calculated catchment level stream and tributary physical and biological parameter concentrations 75th percentiles and trends (p value<0.1) on collected data from 1998-2021 | 112  |
| 2.14   | How Much Habitat Is Enough Version 3.0 (ECCC, 2011)   | 114  |
| 2.15   | City of Ottawa Fish Community Data Results  | 119  |

**Part 3: Land**

| Figure | Title   | Page |
|--------|---|------|
| 3.1    | Land Cover in the Rideau Watershed, 2020  | 132  |
| 3.2    | Impervious Cover in RVCA Subwatersheds  | 135  |
| 3.3    | Impervious Cover in RVCA Catchments   | 136  |
| 3.4    | Riparian-Shoreline Cover in the Rideau River Watershed, 2020                                | 142  |
| 3.5    | Subwatershed Lakes: Natural Riparian Cover in 2008, 2020 and Change                         | 146  |
| 3.6    | Subwatershed Streams: Natural Riparian Cover in 2008, 2020 and Change                       | 146  |
| 3.7    | Subwatershed Major Waterways: Natural Riparian Cover in 2008, 2020 and Change               | 147  |
| 3.8    | Wetland cover in the Rideau River Watershed, 2020   | 153  |
| 3.9    | Woodland cover in the Rideau River Watershed, 2020  | 163  |
| 3.10   | Rideau River Watershed Woodland and Woodland Interior Patch Numbers within Six Size Classes | 167  |
| 3.11   | Rideau River Watershed Woodland and Woodland Interior Area within Six Size Classes          | 167  |
|        |   |      |
| Table  | Title   |      |
| 3.1    | Summary of HMHE Wetland, Riparian and Forest Habitat Targets and Thresholds                 | 130  |
| 3.2    | Rideau River Watershed: Land Cover  | 132  |
| 3.3    | RVCA Subwatersheds: Major Land Cover Conversions  | 133  |
| 3.4    | RVCA Subwatersheds: Impervious Land Cover, Change and Thresholds                            | 134  |
| 3.5    | Land Cover in 30 m Riparian-Shoreline Zone  | 143  |
| 3.6    | Natural Riparian-Shoreline Cover* in 30 m Zone by Waterbody Type                            | 144  |
| 3.7    | Rideau Subwatersheds: Wetland Cover*  | 153  |
| 3.8    | Rideau Subwatersheds: Natural Cover* within 30 m. of a Wetland                              | 156  |
| 3.9    | Rideau Subwatersheds: Wetland Statistics and Targets  | 157  |
| 3.10   | Rideau Subwatersheds: Woodland Cover  | 163  |
| 3.11   | Rideau River Watershed: Woodland Patches  | 166  |
| 3.12   | Rideau River Watershed: Woodland Patches Change   | 166  |
| 3.13   | Rideau River Watershed: Woodland (Core) Interior  | 170  |
| 3.14   | Rideau River Watershed: Woodland (Core) Interior Change                                     | 170  |
| 3.15   | Rideau Subwatersheds: Woodland (Core) Interior  | 171  |
| 3.16   | Subwatersheds: 2020 Woodland Statistics, Targets and Thresholds                             | 172  |
